Extra (shift) stitch

A very common term in crocheting is the extra stitch.
So what is this loop?

When crocheting, almost always the marker of the beginning of the round is shifted to the right side. It is necessary to align it. And how to do it?

You just need to crochet another 1sc at the end of the round and shift the marker by one stitch.
The second stitch becomes the first and the first becomes the last. This is the shift (extra) stitch.

And the most important thing! This stitch is not included in crocheting.

Abbreviations

MR - magic ring
sc - single crochet
inc - increase (2 sc in one stitch)
dec - decrease (2 sc together)
3 sc inc - crochet 3 sc in one stitch
sc3tog - crochet 3 sc together
ch - chain
t-ch - turning chain (when work in rows)
dc - double crochet
sl st - slip stitch
FLO - front loops only
BLO - back loops only
Bobble st - crochet unfinished dc stitches in one stitch with a common top
(...) - number in brackets means a number of stitches in a round
(...)*N- repeat instruction in brackets N times
