We attach the cover to the bottom part of the car by sewing. Before assembling, let's glue a stiff cardboard or plastic piece under the top cover. Aligning the corners while sewing will be sufficient, ensuring that the bottom part of the car does not warp after sewing. When attaching the top piece to the car, sew through the inner loops of the last row of the car, i.e., through the blo.

TENTE: (Join with slst at the end of rows and go to upper row with 1ch.)

17: 1sc,4dc,1sc,4dc... continue in this way until the end of the row.

- Working into the remaining stitches from the BLO that we made in the 7th row, along the row, let's make (2 ch, slst into side stitch) with white yarn.

Let's glue a stiff cardboard or plastic piece under the tent/canopy. Let's embroider on it. To embroider, I first stitched the letters with needle and thread, then I wrapped them with a row of yarn.

Canopy/Tent side cream:

- Make 11 ch (whole process will happen on these ch's.) from the 2nd 3sc,2slst, make 7ch from the 2nd 6sc, 2slst, make 3ch from the 2nd 2sc,2slst, make 5ch from the 2nd 4sc, slst - now turn to other side of ch's and make 7sc to top.

ICE CREAMS:

- 1: 6sc into mr
- 2: 6inc (12sc)
- 3-5: 12sc
- 6: Flo (3ch,2slst)*4

Car handler: Cutting the wire to 5-6 cm, wrap it with yarn. Using glue, fix the handle to the top of the car.

To make a support pole between the tent and the car: Cut the pipe to 10 cm length, make a small notch at the end, and secure our yarn there. Afterwards, wrap the yarn without tightening too much and ensuring it doesn't overlap too closely. Then, attach a stiff cardboard or similar material to both ends and align them to center the bottom and top parts of the car, securing them together with adhesive.
