

CROCHET PATTERN DRAGON SISU

© by Angelina Taranina | @loopy_pattern_design

STORY

Meet this is Sisu the dragon. The dragon in the East personifies spiritual strength, wisdom, goodness and prosperity.

It has a long snake-like body (from 1 to 300 meters), four paws and no familiar wings or fiery breath. At the same time, it can fly and swim thanks to magic and is usually endowed with speech.

Sisu is a very sweet and kind creature with beautiful eyes and a fluffy mane! Let's crochet this adorable magical dragon together.

DESIGNER

Good day, dear friend!

My name is Angelina. I design the patterns for cute crochet toys, for creative people who love to make soulful gifts to loved ones with their own hands. I want people to enjoy crocheting, shut off their brains and to be transported back to childhood thanks to my designs.

These toys you'll want to love, give and have at home. Stock up on yarn, hook and a good mood. I wish you a pleasant time and crochet charming animals.

With love,

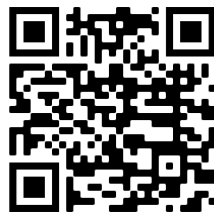

Angelina Taranina

ON A NOTE

My finished toy was 12.5 cm (4.9 inches) high. I used a cotter pin, thanks to which the head can turn in different directions. If you don't want to use it, you can sew the head simply to the body.

You can choose a completely different yarn than suggested here. In this case, you need to choose the size of the hook yourself.

It is advisable to use 100% acrylic yarn (Yarn B, C, D) for the mane.

The wire in this toy is should be used with caution as it is not safe for babies and young children.

For convenience, mark the first single crochet with pin or marker at the beginning of each round. Check the number of loops after each crocheted round (it is indicated in round brackets).

Try to crochet so that the stuffing material is not visible in the toy. If you can't crochet more tightly, take a smaller hook.

CONVENTIONS

l – loop = chain;
sc – single crochet;
sl st – slip stitch;
dc – double crochet;
tr – treble crochet;

inc – increase;
dec – decrease;
(...l) – total number of loops in a round;
[...]xN – repeat what is indicated in round brackets N times.

MUZZLE (Yarn A)

1: 5 loops, turning, 4sc (starting from the 2nd loop from the hook), 4sc (from the back of the chain) (8l)

2: only through back loops [sc, inc]x4 (12l)

3: 12sc, sl st in the 1st sc (12l)

Cut and fix the thread. Mark with a pin the place where the muzzle connect to the head - move the pin to the 2nd loop from the beginning of the round (see photos 1).

Sew the holes between the muzzle and the head using extra thread (see photos 10-12).

13: 42sc (42l)

14: [5sc, dec]x6 (36l)

15: [4sc, dec]x6 (30l)

Insert safety eyes between the rounds 11 and 12, the distance between them is approximately 11 stitches, don't fix yet (see photo 13).

Using yarn needle to do from inner corner to the top of the eye «loose stitch» of **white thread floss** (see photos 14-16). Separate one thread and fasten with a needle «loose stitch» in two places (see photos 17, 18).

Using the yarn needle to do from above of the eye «loose stitch» of **black thread floss** (see photo 19). Separate one thread and fasten with a needle «loose stitch» (see photos 20, 21). Embroider the eyelashes (see photos 22, 23).

Divide the **black threads floss** in half, embroider the nostrils, mouth and eyebrows (see photos 24-36).

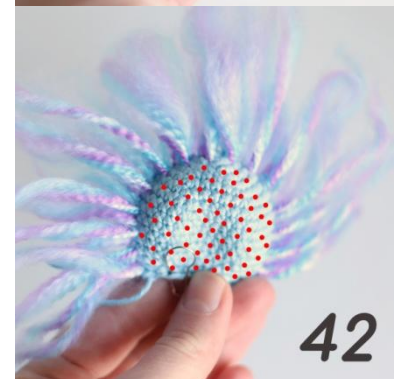

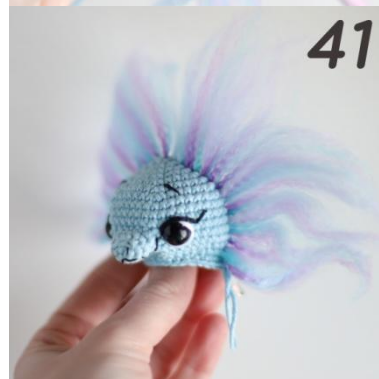

MANE (Yarn B, C, D)

Make approximately 115 hair tresses as shown on video tutorial below (see photo 37). Use the hook to insert the tresses to the head (see photos 38, 39). Place the first row of tresses around the face as shown on photos 40, 41. Arrange the rest of the tresses behind the head, placing them through one loop in a checkerboard pattern (see photos 42, 43). Separate the strands from the face and slightly cut the rest (see photos 44-48).

Optional mix green and blue paints for textile and draw claws on the legs (see photo 126).

Assemblage

Sew your crocheted legs and to the body with a threaded bracing (use round-nosed pliers to make it easier to pull the needle). For this, it is necessary:

1. Attach the legs using needles for cutting (front legs between 34 and 35 rounds of body, distance between legs approx 14 stitches, back legs between 16 and 17 rounds of body, distance between legs approx 6 stitches, see photos 127-129). Check that the dragon stand steadily. Detach the arms and legs without removing the needles from them, and insert other needles for cutting in their place (see photo 130, 131).
2. Insert the needle through the back into the front leg attachment point (leaving the loose end of the thread outside) (see photo 132, 133).
3. Thread the needle through two loops on the inner surface of the leg (the needle for cutting must be in the middle) (see photo 134).

4. Insert the needle into the body at the leg attachment point and pull out it at the point of attachment of the second leg (see photo 135).

5. Pass the needle through the second leg in the same way (see photo 136).

6. Sew the body and the legs two more times in the same way for strength (see photo 137).

7. Insert the needle at the leg attachment point and pull out it at the point of attachment of the opposite back leg (see photo 138).

8. Thread the needle through the leg (see photo 139).

9. Insert the needle into the body at the leg attachment point and pull out it at the point of attachment of the second leg (see photo 140).

10. Pass the needle through the second leg (see photo 141).

11. Sew the body and the legs two more times in the same way for strength (see photo 142).

12. Insert the needle into the body at the leg attachment point and pull out it the back in the place, where it was introduced at the very beginning (see photo 143).

13. Tie a few knots and hide the thread (see photo 144).
